

Caseld: 202045041

Employer: Wide World Importers

Location: Kyoto

Event Date: 1/5/2015

Event: Compressed or pinched by shifting objects or equipment

Nature: amputations

Final Narrative	Hospitalized	Amputation	Part Of Body	Source
While stairs were being installed using a sky trak at the Plano Assisted Living facility, an employee on the ground who was directing the stair placement got his left index finger caught between a metal stud and the stair. The employee was transported to Methodist Richardson and had surgery the next day to amputate his finger at the knuckle.	0	1	fingernails	metal
